

IDE Time Tracker - Developer Quick Start

Prerequisites

- Java 11+
- Chrome/Chromium
- Node.js (optional, for dashboard)

Install

```
bash

# Clone repo
git clone <your-repo>
cd IDE_time_tracker

# Build backend
cd ide-time-tracker
mvn clean package
cd ..

# Setup tracker folder
mkdir tracker-folder
copy ide-time-tracker\target\ide-time-tracker-1.0-SNAPSHOT-jar-with-dependencies.jar
```

Windows: Create `tracker-folder/start-tracker.bat`:

```
batch

@echo off
cd /d "%~dp0"
start "IDE Tracker" java -jar ide-time-tracker-1.0-SNAPSHOT-jar-with-dependencies.jar
timeout /t 3
start "Server" java -cp ide-time-tracker-1.0-SNAPSHOT-jar-with-dependencies.jar com.
```

Mac/Linux: Create `tracker-folder/start-tracker.sh`:

```
bash

#!/bin/bash
java -jar ide-time-tracker-1.0-SNAPSHOT-jar-with-dependencies.jar &
sleep 3
java -cp ide-time-tracker-1.0-SNAPSHOT-jar-with-dependencies.jar com.idetracker.Trac
```

Load Extension

1. Go to `chrome://extensions/`
2. Enable Developer Mode (top right)
3. Click "Load unpacked"
4. Select `browser-extension/` folder
5. Pin extension to toolbar

Run

Windows:

```
bash  
  
tracker-folder/start-tracker.bat
```

Mac/Linux:

```
bash  
  
chmod +x tracker-folder/start-tracker.sh  
./tracker-folder/start-tracker.sh
```

Wait for both windows to show "started".

Test

1. **Verify server:** Open `http://localhost:8080/time-data` in browser → should show JSON
2. **Open IDE:** Use VS Code, IntelliJ, etc.
3. **Check extension:** Click extension icon → should show earned/used time
4. **Code for 2 min:** Extension should show increased earned time
5. **Visit Netflix/Instagram:** When time runs out, page blocks with message

Optional: Dashboard

```
bash  
  
cd react-dashboard  
npm install  
npm run dev
```

Opens at `http://localhost:3000`

Blocked Sites

Edit these files to customize:

- `browser-extension/background.js` line 6
- `browser-extension/popup.js` line 3

Both must match.

Troubleshooting

Issue	Fix
Server offline error	Check <code>http://localhost:8080/time-data</code> in browser. Restart if needed.
Only one window opens	Check second window for errors. May need to run Java commands separately.
IDE not detected	Wait 10 seconds. IDE window must be active. Check tracker console shows updates.
Port 8080 in use	Kill process: <code>netstat -ano findstr :8080</code> then <code>taskkill /PID <PID> /F</code>

Data Location

Tracking data saved to: `C:\Users\YourName\ide_time_data.json`

Delete this file to reset all data.

That's it. Code, earn time, browse responsibly. 🎮
